

PRODUCT CATALOG

YEAR 2024

CAHAYA TECHNOLOGI

Bobbin Heater

Heats air and liquids, prevents degradation, removable for maintenance.

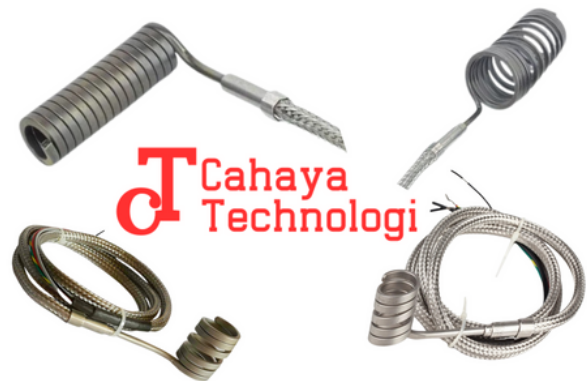

Silica Heater Infrared

Heats air and liquids, durable, efficient, and maintenance-friendly.

Immersion Heater

Heats liquids directly, efficient, versatile, and easy to maintain.

Coil Heater

Heats efficiently, flexible design, rapid heating, and maintenance-friendly.

Tubular Heater

Heats air and liquids, versatile, durable, and easy to maintain.

Casting Heater

Provides uniform heating, durable, efficient, and ideal for custom applications.

Catridge Heater

Compact, efficient heating, precise control, and easy to install.

Finned Heater

Heats air efficiently, increased surface area, durable, and maintenance-friendly.

Silicone Rubber Heater

Flexible, efficient heating, moisture-resistant, and easy to install.

Band Heater

Heats cylindrical surfaces, efficient, durable, and easy to install.

Stripe Heater

Provides linear heating, versatile, durable, and easy to install.

Ceramic Band Heater

Heats cylindrical surfaces, durable ceramic construction, efficient, and easy to install.

Ceramic Infrared Heater

Efficient infrared heating, durable ceramic, precise control, versatile application.

Quartz Halogen

Efficient radiant heating, durable quartz, precise control, versatile applications.

Bimetal Thermometer

Temperature measurement using bimetallic strips, accurate, durable, and versatile design.

Pressure Gauge

Pressure regulation device for consistent, reliable, and adjustable pressure control.

Level Switch

Level sensing device, detects liquid levels, reliable, durable, and versatile.

Ceramic Tube

Ceramic tube: heat - resistant, durable, insulating, for high-temperature applications.

Thermocouple

Thermocouples are temperature sensors with types such as type K (wide range), type J (low range), type T (low range), type E (high precision), type N (wide range), and type B (high precision at high temperatures), suitable for various industrial and laboratory applications.

Panel Maker

Manufactures electrical panels for industrial and commercial use.

Thermowell

Protects sensors, ensures precise temperature measurement.

Flexibel Hose

facilitates fluid or gas transfer with ease and efficiency.

Burner

Combusts fuel efficiently for heat or energy generation applications.

Heatsink

Efficiently dissipates heat from electronic or mechanical devices.

Accessories

organize and secure electrical connections efficiently.

INDUSTRIAL PRODUCT

- Timer
- Counter
- Tachometer
- Line speed meter
- Voltage Meter
- Current Meter
- Photo Sensor
- Proximity
- Reed Sensor
- Solid State Relay
- Temperature Controller
- Floatless Level Relay
- Phase Relay
- Spark Quencher
- Fuzzy + PID Temp. Controller
- Wheel Length Encoder
- Power Regulator
- Light Curtain
